

# Mobile Applications Research

**Smuddy**

Available to all LiveLabs participants

- See crowd conditions across campus  
**Saves time!**
- Send and receive location based messages  
**The new SMU WhatsApp**
- Receive promotions from vendors in SMU and outside  
**Get the best offers!**
- Join a vibrant community  
**Suggest and design apps that you want**

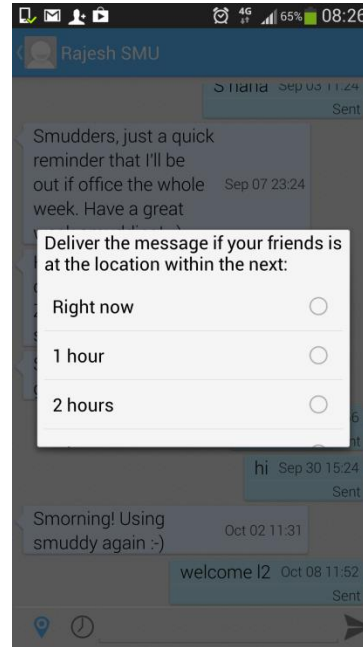

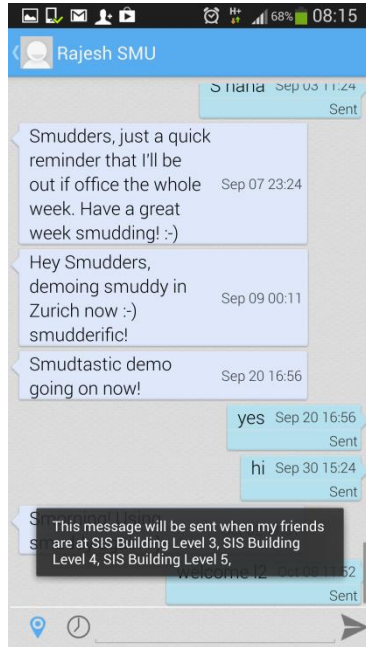

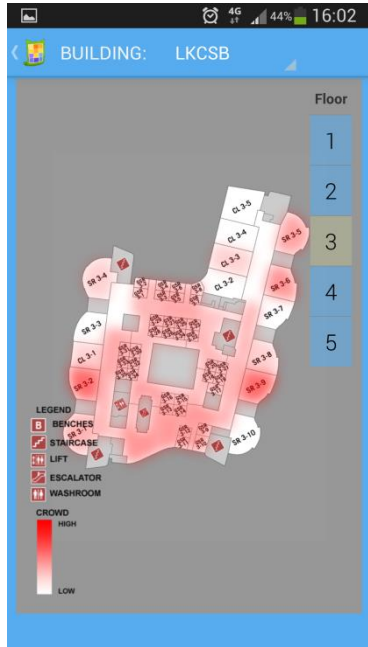

Smuddy is a mobile application designed for LiveLabs participants. It offers several key features: real-time crowd monitoring across the campus to save time, a location-based messaging system for SMU WhatsApp, access to vendor promotions both on and off campus, and a vibrant community for users to suggest and design new apps.
