Message from Workshop Chairs, NetHealth Workshop

The theme for the Nethealth workshop 2017 is “Affordable Healthcare in India”. The session includes panel discussions, invited speakers, and paper presentations. The workshop has been designed to ensure that all key stakeholders in the healthcare innovation ecosystem get a chance to participate and learn from the event. Participants will get an opportunity to interact with industry leaders, academic stalwarts, upcoming startups, mobile health pioneers, and clinical experts as well as with each other during the sessions. The goal of this workshop is to bring experts from different domains that have a shared passion for Affordable Healthcare in India on a common platform to discuss the challenges and ideate realistic solutions. We hope that as a result of this intermingling of various domains, we can build synergies among the multidisciplinary participants to help in the development of new healthcare technologies for India.

As the chairs of this workshop, we are very excited to share that we are expecting a strong presence from doctors, engineers and healthcare professionals from various backgrounds in this workshop. This will be a unique opportunity for entrepreneurs and engineers to interact with clinicians and receive feedback on their respective projects. Most importantly these clinicians have keen interest to support healthcare innovations and many have themselves had prior experiences in the development of new healthcare technologies.

We welcome all participants to attend and benefit from this workshop to ignite the spirit of innovation for the development of new healthcare technologies for India.
