

Cyber Security and Privacy Workshop

Message from the Chairs

The COMSNETS 2024 Cyber Security and Privacy Workshop is a one-day event held on January 3, 2024, in conjunction with the main COMSNETS 2024 conference. This workshop is intended to be a forum where researchers can meet and discuss the latest in cyber security and privacy topics as they apply to communications systems.

This year's program includes keynote talks by Prof. Supratik Mukhopadhyay (Louisiana State University, USA) and Ms. Tulika Pandey (Ministry of Electronics and Information Technology, Government of India), invited talks by Prof. Andrey Chechulin (SPC RAS, Russia) and Dr. Dmitry Levshun (SPC RAS, Russia) and a panel discussion involving Dr. Sushmita Ruj (UNSW Sydney, Australia), Prof. Balaji Palanisamy (University of Pittsburgh, USA) and Prof. Andrey Chechulin (SPC RAS, Russia). In addition, the program features 8 oral paper presentations. This year the workshop received multiple submissions from around the world. As a result, the technical program committee was able to derive a strong and topical program with papers covering diverse problems pertaining to security, machine learning and privacy.

We look forward to fruitful interactions at the workshop.
