

## Theme: AI with Purpose: Women Designing for Future

### Message from the chairs

We are so grateful and privileged to conduct The Women in Engineering (WiE) @ COMSNETS 2026 which aims to impart value to the larger audience globally. It is also a platform to unite women researchers, practitioners, and leaders with engaging hands-on workshops and paper presentations from the students in the latest technology.

Our goal is to empower women in technology by delivering impactful workshops led by industry leaders, with a emphasis on **AI with Purpose**. The initiative also enables students by providing a platform to showcase their ideas, innovations, and real-world applications.

This platform creates a unique opportunity to learn directly from industry leaders, gain insights into the rapidly evolving technology landscape, and actively promote **diversity and inclusion in engineering**, while encouraging students to confidently step forward and present their work.

This year's program ([https://www.comsnets.org/women\\_in\\_engineering.html](https://www.comsnets.org/women_in_engineering.html)) features an immersive, hands-on workshop led by an industry leader who is widely recognized as a **Speaker, Author, Coach, and Trainer**, with impactful contributions across coaching, mentoring, and learning & development in the technology ecosystem. By the end of the workshop, participants will gain the skills to design and build their own **Generative AI-based solution**.

In addition, we are introducing a new initiative this year—the **WiE Presentations Track**—which provides an exclusive platform for all-girl student teams to showcase and present their innovative work.

### Speakers:

**Ramesh Rajini**, Senior Principal Consultant, Infosys

**Workshop Title:** From Idea to Prototype - Building your App with Google AI Tools

**Ramesh Rajini** is a seasoned **Senior Principal Consultant (Learning)** at **Infosys**, known for her leadership in **Cloud and Artificial Intelligence (AI)** and her commitment to mentoring and community building in tech.

Her online presence reflects **thought leadership**, a passion for **mentorship**, and **community impact**, with frequent posts aimed at empowering others

and sharing practical tech and career insights.

The workshop will be led by an accomplished **Corporate Trainer and Mentor in Cloud and Generative AI** with over **18 years of experience** impacting more than **a million learners globally**. An award-winning author and passionate community leader, she brings a rare blend of technical depth and human-centric leadership. Deeply committed to **AI with Purpose**, she empowers learners—especially women—to use Cloud and GenAI responsibly to solve real-world problems, break barriers, and create meaningful, sustainable impact.

And more:

- ▶▶ Building RichMommies -Made by Moms & For Moms with Grit
- ▶▶ Award Winning Author- 'Friction-Free Parenting'
- ▶▶ NASSCOM Mentor
- ▶▶ Google WTM Ambassador
- ▶▶ Cloud & AI Coach

#### **Presentations:**

**Team:** NovaMind

**Title:** ReguGraph: A Knowledge-Grounded Generative AI System for Explainable RBI-Compliant Financial Intelligence.

**Student:** Nandini Arimanda, 4th year Student, Shiv Nadar University, Chennai

**Mentor:** Dr. U. Padmavathi, Assistant Professor, Shiv Nadar University, Chennai.

**Mentor's LinkedIn:** <https://www.linkedin.com/in/dr-padmavathi-u-292156238/>

#### **Co-chairs:**

1. **D N Sujatha**  
BMSCE, Bangalore, India
2. **Ambika J**  
Finastra, Bangalore, India
