

ComsNets 2026 Cyber Security and Privacy Workshop
Message from the Chairs

Welcome to the Cyber Security and Privacy (CSP) Workshop, held on January 6, 2026, in conjunction with the prestigious ComsNets 2026 conference. This workshop is designed to foster a collaborative forum where researchers, industry practitioners, and academics come together to exchange ideas, engage in meaningful discussions, and share the latest advancements in cyber security and privacy within the domain of communication systems. As communication technologies evolve at an unprecedented pace, the challenges of securing networks and protecting user privacy have become increasingly complex and critical. Addressing these challenges is central to the mission of the CSP workshop.

This year's program features two keynote addresses by distinguished experts, each offering unique insights into emerging trends, challenges, and future research directions in cyber security and privacy. In addition, the workshop includes high quality oral paper presentations that highlight cutting-edge research and innovative solutions across a broad range of topics, including secure communication protocols, privacy-preserving machine learning, and novel approaches to contemporary security threats.

The response to the workshop's call for papers has been exceptional, with submissions from researchers around the world. Each submission underwent a rigorous peer-review process conducted by the technical program committee, resulting in a strong and timely technical program. The selected papers span both theoretical foundations and practical implementations, reflecting the depth and diversity of current research in the cyber security and privacy landscape.

We hope that ComsNets CSP 2026 serves as a vibrant platform for intellectual exchange, collaboration, and networking. The discussions and interactions fostered during this workshop promise to spark new ideas, inspire collaborations, and drive innovations that advance the state of the art in securing communication systems and protecting privacy. Thank you for joining us, and we wish you a productive, engaging, and impactful workshop.
