Growth, Challenges and Considerations for Telco / ISPs

Dipak Vagadiya
National Manager, SDN and Data Center Networking
HP Networking India.
Superfast Technology Adoption in 21st Century Created “new Globe” like never before..

- Smart Everything
- Smart City
- Smart Phone
- Smart Grid
- Smart Car
- Smart Appliances
- Smart What not?

This means Growth
This Dynamic Growth Brings Challenges:

- High Availability Expectations
- Scalability / Growth Management
- Network Performance Management
- Information Security
- Operations Complexity
- Heterogeneous environments and Interoperability
- Fast moving Technology Trends
- Human Resources / Skills
- Network Boundaries and its Management
- Dynamic OPEX
Suggested Considerations

- Strategically Invest more in to Test Lab Environments (Experiment more)
- Grow In house Performance Management systems (like Google and Amazon)
- Innovate through combination of SDN, NFV and Cloud Technologies
- Drive Collaboration between Engineering groups within India.
How May we Help?

- Cloud Grade Data Center Networking Solutions
- Innovative Cloud and Storage Systems
- Next Gen. Infra / Network / Cloud Management Tools
- SDN, NFV and Distributed Cloud Networking Solutions
- Big Data, Hadoop and everything around Cloud
- Technology Services and Consulting
Make it to..

Make it Simple
Make it Matter
Make History

Thank you!
