

### **Message from Mentoring Session Chairs**

Leveraging on the success of past years, we are again hosting the Mentoring session in COMSNETS 2020 as well. The goal of the mentoring session is to facilitate formalized and structured interactions between undergraduate and graduate students (Mentees) and Mentors from around the world in COMSNETS 2020. This is a unique opportunity for Mentees to meet and network as well as seek mentorship from Mentors. Each mentee will be matched with one or more mentors based on their research interests and requests by Mentees during a dedicated time slot in the conference. Close to twenty five leading experts, from within India as well as from abroad have kindly volunteered to participate as mentors in the program. Similar to previous years, it again promises to be a really fruitful event for the mentees.
