

A warm welcome to the 12<sup>th</sup> International Conference on COMMunication Systems & NETworkS Panel Discussions! Compute, AI and 5G will rule next 10 years. We present to you eminent thought-provoking panels having sound knowledge in the field of entrepreneurship, policy, strategic implementations and networking, who will be speaking on the below mentioned topics:

- 1. *AI/ML enablers for SMART Networks***
- 2. *Standards beyond 5G***
- 3. *India – the Greenfield for SMART Villages and Cities***

We are pleased to inform that the panel discussions will be a blend of opinions as well as fact checks on current scenarios as the panel members as well as the panel moderators are distinguished key research members from academia, industry as well as policy making. The topics finalised are of interest to majority of people and will be able to discern the myths and help in understanding where we stand in the selected topics.

Further, the panel discussions have been shaped in a way to enthrall the attendees presenting a clear perception of views. It will be a journey of deeper understanding, raising opinions in favour as well as against the current trends and policies amended, discussions on gaps and loopholes as well as insights on deployment feasibilities.

We welcome you all to be a part of the vibrant Panel Discussions!
