Welcome to COMSNETS 2020 Poster Session! We take this opportunity to thank all the authors who have submitted their work to COMSNETS 2020 Poster Session. The COMSNETS 2020 Poster Session consists of posters showcasing preliminary/ongoing work in a variety of topics in networking, communication systems, and artificial intelligence/machine learning domains. This year we accepted a total of 44 papers for the poster session. Out of these, 18 papers from the main conference track directly as posters. The rest were accepted from the new submissions received to the poster session. We sincerely thank all the TPC members and the anonymous reviewers for their timely help in the reviewing process. We invite all the conference delegates to attend the poster session which would be presented in two sessions (one on 8th and one on 9th of January 2020) and interact with the presenters on their ongoing research work. We hope that it will be a stimulating environment for all the participants of COMSNETS 2020. During the poster session, three posters will be selected for best poster awards by a jury. Looking forward to seeing you all at the poster session.
