

LastMileS Workshop @ COMSNETS 2020 is a cross-cutting forum that will bring together researchers, practitioners, smart-city stakeholders, and technology leaders to present their latest research and innovations in the area of “last-mile” communication, networking, data transfer and analysis framework; with a deep focus on enabling digital transformation and harmonization of smart infrastructure to help bring down the costs and improve operational efficiency in smart city deployments across the world.

We have a great program in place: 6 peer-reviewed research papers from leading research institutes and labs across the globe; 2 keynote talks by eminent technology leaders; 4 invited talks by distinguished leaders from industry on 5G architecture, knowledge sharing in smart infrastructure such as smart water grid, and technical challenges in large smart city deployments. We also have a session where the eminent panelists will debate over various aspects related to "Standardization and Technology Challenges in Smart Infrastructure Deployments and Last-mile Systems".

On behalf of the organizing and steering committee, Ashwin Ashok and Seshan Srirangarajan welcome you to be part of the LastMileS workshop on the 7th of January 2020 at Hotel Chancery Pavilion in Bangalore, India.

Ashwin Ashok
