

Message from the TPC Chairs

Welcome to COMSNETS 2022! This year's technical program consists of 47 contributed papers, 11 invited talks, and 5 invited papers from leading researchers across the world. All the submissions will be digitally published in the IEEE Xplore library as the proceedings of COMSNETS 2022. We received 145 submissions out of which 138 were sent for review. The TPC consisted of 92 members from academia and industry from around the world. The final program consisting of 47 papers was chosen through a rigorous review process. In addition, a few papers on the borderline were forwarded to the poster chairs to be considered for the poster session at COMSNETS 2022. We would like to thank all the TPC members for their time and efforts.

The 47 accepted papers and the invited talks have been divided into 11 sessions to be presented across three days from January 5-7, 2022. All sessions will allow both physical *and* virtual attendance. In addition, the conference will include a poster session, multiple workshops, tutorials, demo sessions, a graduate forum, and panel discussions.

We would like to thank the COMSNETS Steering Committee for giving us the opportunity to serve as TPC Co-Chairs for this conference and the general co-chairs and the rest of the organizing committee of COMSNETS 2022 for their co-operation.

After a fully virtual conference in 2021, we are extremely happy that the 2022 edition will be conducted in a hybrid mode with an expected 130 people attending in person. We wish you the best of health and hope that you enjoy the conference.

Sincerely,

Swarun Kumar
