

Cyber Security and Privacy Workshop

The COMSNETS 2023 Cyber Security and Privacy Workshop is a one-day event held on January 4, 2023 in conjunction with the main COMSNETS 2023 conference. We are honored to have keynote talk “Security of Critical Cyber Physical Systems: A C3i Hub Perspective” by Professor Sandeep Shukla

(IIT Kanpur, India) and a panel discussion on “Crystal-gazing Cybersecurity and Privacy for T20s” involving Salil Kanhere (UNSW, Australia), Tulika Pandey (MeitY, India), Sandeep Shukla, and Mridula Singh (CISPA, Germany).

This year the workshop received multiple submissions from around the world. As a result, the technical program committee was able to derive a strong and topical program with papers covering diverse problems pertaining to security, blockchain technology and privacy.

We look forward to a fruitful interaction at the workshop.

Prof. Yuval Elovici, Ben-Gurion University, Israel

Dr Sachin Lodha, TCS Research, India
