

Message from the TPC Chairs

Welcome to COMSNETS 2023! This will be the 15th edition of the conference, a milestone for what has become the premier networking and systems conference in India. This year's technical program consists of 34 contributed papers, 10 invited talks, and 8 invited papers from leading researchers across the world. All the submissions will be digitally published in the IEEE Xplore library as the proceedings of COMSNETS 2023. We received 92 submissions out of which 86 were sent for review. The TPC consisted of 98 members from academia and industry from around the world. The final program consisting of 34 papers was chosen through a rigorous review process. We would like to thank all the TPC members for their time and efforts.

The 34 accepted papers and the 10 invited talks have been divided into 11 sessions to be presented across three days from January 5-7, 2023. All sessions will allow both physical *and* virtual attendance. In addition, the conference will include a poster session, multiple workshops, tutorials, demo sessions, a graduate forum, and panel discussions.

We would like to thank the COMSNETS Steering Committee for giving us the opportunity to serve as TPC Co-Chairs for this conference and the general co-chairs and the rest of the organizing committee of COMSNETS 2023 for their co-operation.

Sincerely,
