The Workshop on Machine Intelligence in Networked Data and Systems (MINDS) at COMSNETS 2023

Message from the chairs

The Workshop on Machine Intelligence in Networked Data and Systems (MINDS) @ COMSNETS 2024 aims to bring together researchers and practitioners to showcase recent advances at the intersection of machine learning and networked systems, and its applications to healthcare, social media, communications, environment, retail, transportation, life sciences, e-commerce, and cloud services.

This year’s program (https://www.comsnets.org/minds_workshop.html) is highlighted by five keynote talks from trailblazers in academia and industry who are transforming both theory and practice of machine learning, 9 full oral presentations and an exciting poster session of 4 papers. Showcasing the state-of-art in machine intelligence, these talks cover a diverse list of topics such as machine learning and data analysis methods, robotics and autonomous systems, IoT and wireless communications, real-time systems and video processing as well as agricultural technology advancements.

On behalf of the organizing and steering committee, we welcome you to MINDS 2024 on Jan 03, 2024. We look forward to your participation in the workshop.
