Mentoring Sessions @ COMSNETS 2024

The goal of the mentoring session is to facilitate formalized and structured interactions between undergraduate and graduate students and the academicians and industry experts from around the world attending COMSNETS 2024. This is a unique opportunity for mentees to meet, network, and seek mentorship from renowned mentors that is otherwise hard to achieve.

This year we received applications from 40 students requesting mentoring sessions for a mix of latest topics such as, quantum computing, AI/ML applications in network and health, human computer interaction, next generation networks – 5G/6G, cyber security, and wireless communications.

Our team of 18 mentors come from extremely diverse backgrounds and globally reputable venues such as, CISPA Germany, Purdue University, University of Washington, IIT Delhi, IIT Kanpur, MIT Square, University of New South Wales, BITS Pilani, Ericsson, and Nokia.

We thank the COMSNETS Steering Committee for allowing us to serve as the Mentoring Sessions Co-Chairs for COMSNETS 2024. We wish good luck to all students for having a successful meeting with their mentors.

Sincerely,

Dr. Devashish Gosain
BITS Pilani, Goa, India

Dr. Dheryta Jaisinghani
University of Northern Iowa USA

Dr. Mukulika Maity
IIIT-Delhi, India
